

Catering for Gifted and Talented Students

Mr Stephen Sunderland
(PEAC Coordinator, Balcatta Senior High School, WA)

ABSTRACT

This will be an interactive session. After providing some initial background on the identification of gifted students, practical teaching strategies for classroom students and information on the characteristics of an appropriate gifted and talented program from a school perspective, Stephen will then throw the session open to questions. This enables the group to seek answers to their queries rather than run the risk of listening to information they already know.
